

CONDOR™ SURFACE SET SERIES

The Condor Series is generally used in softer rock formations. Hoffmann offers a complete range of coring bits, reaming shells, casing shoes/bits, and non-coring bits for any size tooling.

STANDARD SIZES

SEMI ROUND

An all purpose design.
Ideal for most formations.

SPIRAL DESIGN

Fast penetration for soft
shales and sandstones.

STEP DESIGN

Stabilizes drilling
and increases
penetration in
hard formations.

FACE DISCHARGE

Discharge ports at
the face increase core
recovery by reducing
sample erosion.
